Health and Safety Policy of the ANDRITZ HYDRO Group

We are aware of our responsibility

We know that our business – the manufacturing and service of products and systems for hydropower plants – may create risks to health and safety. We are therefore aware of our special responsibility for our employees and others affected by our activities.

- We aim to prevent personal injuries and to prevent property damage.
- We give health and safety a high priority in all our activities.
- We aim to improve continually our health and safety performance.

Health and Safety management

Our occupational Health and Safety management is certified by a renowned accredited body according to the standard OHSAS 18001 and is integrated in our global Management System.

Integration of all stakeholders

- We identify the hazards created by our activities, assess the risks to health and safety and implement preventive control measures so far as reasonably practicable to minimise such risks.
- Effective health and safety management requires communication, co-ordination and supervision. We coordinate our health and safety activities with our partners and customers.
- Our executives set examples for good health and safety practice and promote health and safety awareness to all our employees. In support of this, we provide adequate resource and training.
- All employees and contract personnel have to contribute to health and safety matters, observe health and safety instructions and use the safety equipment provided.
- We contribute to the stability of our business results by acting in compliance with health and safety legislation, minimising risks to people, plants and products and by being proactive in the prevention of accidents and incidents.

ANDRITZ HYDRO – Safety by Competence
